Clearwater reserves the right to change
product specifications without prior notice.

E&OE April 2026.

WELCOME TO CLEARWATER

The essential ingredients to create an inspirational kitchen are functionality, great design and faithful reliability. Our company ideal is to combine all three of these elements to provide the perfect sink and tap for you.

With Clearwater Products you can tailor and fine tune your exact requirements by selecting from the wide choice of sink and tap types, designs and materials.

We have divided our sinks between material and installation types and our taps between function and styles so you can quickly navigate our brochure to discover the perfect combination for your cooking, cleaning and design aspirations.

Our staff have extensive knowledge and experience of the kitchen industry and we are always on hand to answer any questions you may have - without you having to run the gauntlet of the automated switchboard!

All our products are sold exclusively through our network of dealers.

Phone us now for your nearest retail outlet.

INSTALLATION

INSET Sink is mounted into the worktop, suitable for all types of worktops.

UNDERMOUNT Sink is fitted to the underside of the worktop, only suitable for solid surface worktops.

APRON FRONT Sink is fitted directly onto the cabinet, only suitable for solid surface worktops.

BOWLS

SOFT RADIUS

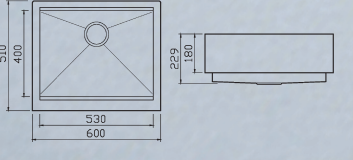
Easy to clean traditional styling

SHARP RADIUS

Slick contemporary styling offering many price levels and steel thickness options

SIZING

The sizing is based on ensuring the cabinet is large enough to fit the bowl or bowls.



QUAREX®

QUAREX®

The latest generation of Quarex® has been achieved over many years of development and this latest compound which includes 80% quartz has been enriched with silver ions.
Silver nano-particles form a protective coating on the surface of the granite with the anti-microbial properties reducing the growth of bacteria and microbes by as much as 98%.

HYGIENIC SURFACE

The advanced anti-bac surface ensures optimum safety when handling food and the fine structure of Quarex® offers dirt-repellent properties.

RESILIENT SURFACE

The robust qualities of Quarex® ensure high resistance to the rigours of the kitchen environment including a high ability to withstand scratches, impacts and high temperatures.

NOVA QUAREX®

The **Nova** collection of sinks offer a selection of bowl sizes that will suit all kitchen demands, from the Compact N330 secondary/entertainment sink to the huge N780 with capacious dimensions that will swallow up the largest of oven trays and pans. The soft radius corners of the Nova make it an ideal choice for both modern and retro kitchen designs. They can be installed as undermount or inset.

CAPRI

QUAREX®

The **Capri** collection comprise three futuristic styled bowls featuring a unique sloping rear ledge housing the overflow outlet. This unusual arrangement looks very sophisticated when combined with narrow radius bowls which emphasize the Capri's crisp lines. The Capri's Ledge Overflow maximizes the depth of water in the bowl before the overflow is employed.

The Capri can be installed as an Undermount or Inset.

Stainless Steel Square Wastes are supplied with the Capri in keeping with the Capri's ultramodern aesthetics.

KAMEO SMART

QUAREX®

The **Kameo** sinks feature a 'Smart Ledge' that is designed into each bowl enabling a set of four catering accessories to be employed for chopping, straining and draining. These sinks combine fresh contemporary styling with huge capacity bowls that will swallow up a multitude of jobs.

The D150L principal bowl is noteworthy for its unrivalled generous width of 400mm. This has been achieved by minimizing the strainer bowl with the use of a compact 60mm strainer waste and the extra space gained has been allocated to the main bowl where it is needed most.

STEEL (ST) SLATE (SL) JET (JT)

KAMEO-X SMART

QUAREX®

The **Kameo-X** Smart is a super new addition to the Kameo family. It's 'super' because it offers the usability of a generous single bowl with the flexibility of a separate drainage outlet for disposing of annoying dregs. For those who always felt they had to have a 1.5 bowl sink for flexibility but really wanted the size of a big single bowl, this will be a must-have alternative, particularly if you only have a 600mm cabinet space to play with.

The Kameo-X also includes the 'Smart' accessory rail system that makes the Kameo special, the accessory ledge accommodates a chopping board and a folding stainless-steel draining mat.
The secondary drainage outlet also acts as the sink's overflow, allowing the main bowl to be used to its maximum depth.

Kameo-X Smart 1.25 bowl
Ref. KAMS125 £310

Overall size: 560/500/206 mm
Bowl size: 499/347/190 mm
Cutout size: 540/480 mm
Minimum cabinet size: 600 mm

ARINA SMART

QUAREX®

The **Arina** is notable by its side tap-ledge in place of the typical rear position, this allows the bowl to take up the full depth of the sink improving capacity for the bigger pots and pans which bely the Arina's compact dimensions. Both models are equipped with the 'Smart' accessory rail system to station the chopping board that is included with both models.

Gemini D150S in Jet shown with Magus 3 kettle tap in Chrome - *see pages 136-137*

GEMINI
QUAREX®

The **Gemini** steps away from the fashion for minimalist symmetry and instead embraces a soft curved design. The bowl sizes are larger than most sinks and the drainer is particularly smart.

The Gemini would be an ideal choice with Shaker style kitchens.

Available in three Quarex® colours.

Magus 3 kettle tap in Chrome - *see pages 142-143*

VESTA COMPACT

QUAREX®

The **Vesta Compact** design is designed for smaller kitchens when worktop space is at a premium. The reduced sink lengths enable slightly larger food-prep area, and as we all know in a small kitchen every centimetre counts.

The three models are all available in six wonderfully understated colours that will blend with virtually any colour scheme

MIO COMPACT
QUAREX®

The **Mio Compact** family of sinks are designed for small kitchen spaces with their scaled down dimensions. The slender profile depth makes them an ideal choice for galley kitchens.

Also, not notably from the same gene pool - is the very smart Mio Compact round bowl which is a great option as a secondary/entertainment sink.

QUARSIL®

QUARSIL®

The new generation of Quarsil® has been developed over 30 years and now features substantially improved properties. It is now even easier to clean and has a new intensity of colour.

HYGIENIC SURFACE

The advanced anti-bac surface quality of Quarsil® ensures optimum safety when handling food.

DIRT-REPELLENT EFFECT

The material's fine structure means dirt that could be a breeding ground for bacteria finds it impossible to stick to the surface.

PRODUCT **BENEFITS**

QUARSIL® Granite sinks are up to 80% natural quartz sand and specially developed for the demands of the kitchen, and the rigours of everyday use.

Dirt-repellent effect

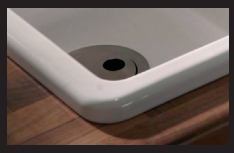
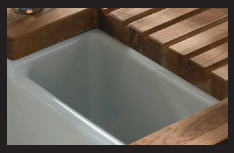
CERAMIC SINKS



Inset

This installation requires the sink to be mounted into the worktop from the top. This installation type is suitable for all types of worktop including laminated chipboard.



Undermount

This installation requires the sink to be fitted to the worktop from the underside. This installation type is only suitable for solid surface worktops such as Granite, Marble or Wood.

Apron Front

In this installation the sink is fitted directly on to a cabinet with its front fascia exposed. This type of installation is only suitable for solid surface worktops such as Granite, Marble or Wood.

PRODUCT BENEFITS

Heat Resistant: Ceramic is heat resistant to 1200° centigrade - this means pots from the stove and casserole dishes straight from the oven can safely rest on a ceramic sink.

Hygienic: Totally non-porous, the ultra smooth surface is the most hygienic material for sinks and the easiest to keep clean.

Chemical Resistant: Resistant to all household chemicals including neat bleach.

Extreme Hardness: Extremely resistant to impact, the surface is so hard cutlery won't scratch the glazed surface through normal use.

Dirt-repellent effect · Odour-free · Heat-resistant 180°C · Food-safe

Hygienic Surface · Made to last · Stain-resistant · Impact-resistant

Tap Holes

Chargeable knock-out service available on request

The dimensions of ceramic sinks may vary by +/- 2% from those given due to natural shrinkage and expansion during the manufacturing process.

R10

LIFE TIME CERAMIC SINKS WARRANTY

The **Metro** collection are a versatile range of bowls that can be installed as either undermount or inset installations. There are three single bowl options to select, choose a stand alone or even a combination of two together. The multi-combined bowl option is particularly smart with extra-slim partition walls providing a more sophisticated look than other ceramic options.

Metro sinks are available in gloss White and matt Sea Mist.

APRON FRONTED

The following pages contain a comprehensive collection of Butler sinks. We offer two main ranges; our 'British Classics' are quintessential vintage designs which are handmade by skilled artisans, while our 'Contemporary Collection' gives a modern tilt to the traditional Butler sink. We also include some practical utilitarian sinks that are ideal for the utility or boot room.

In this installation the sink is fitted directly onto a cabinet with its front fascia exposed.

This type of installation is only suitable for solid surface worktops such as Granite, Marble or Wood.

BRITISH CLASSICS

Pages 51- 65

Our British Classics are a collection of handmade sinks using traditional methods by skilled artisans who pride themselves in reproducing heritage icons.

- Timeless appeal
- Soft sculpture profiles
- Traditional thick walls
- Solid wall construction
- Glazed twice for a beautiful surface finish
- Hand-made by skilled Artisans
- Made in Britain

CONTEMPORARY COLLECTION

Pages 66 - 73

Our Contemporary Collection is a modern interpretation of the classic Butler sink. The use of modern manufacturing techniques has resulted in a slimmer profiled design bringing a layer of modernity to these traditional classics.

- Slim-profile walls
- Light weight construction
- Suitable for modern and traditional styles

UTILITY & LAUNDRY

Pages 74 - 75

Belfast shown with Davina Twist & Spray tap in Chrome - *see page 174*

BELFAST BRITISH CLASSICS

This British Classics **Belfast** faithfully follows the original architectural lines of its forebears, boasting thick softly profiled walls with a classic weir overflow.

CHANTERLY

BRITISH CLASSICS

Command your kitchen with the **Chanterly**, a solid ceramic undermount designed for those who truly cook. Its expansive main bowl effortlessly "swallows" professional-grade pans and baking trays, while the generous second bowl handles everyday tasks with ease. Featuring a unique low-profile partition, the Chanterly offers the best of both worlds: use the bowls independently for water-saving efficiency, or flood both to create one massive, uninterrupted soaking zone.

LEGACY

The **Legacy** Butler sinks combine tradition with modernity, the slimmer wall construction gives this classic design a subtle elegance that contrasts with the more robust architecture of the British Classics shown on the preceding pages. We offer two installation options; without a tap ledge, or with a tap platform suitable for a Monobloc mixer tap. This option negates the bother of drilling a hole in the work surface.

Ashton 60 shown with
Titania Stainless Steel tap - *see page 208*

ASHTON 60

The **Ashton** is a classical Butler sink incorporating a tap ledge with three semi-prepared tap-hole positions, making it suitable for a variety of tap styles. A useful accessory ledge has been added to the bowl profile to support a range of accessories - we will be pleased to announce the launch of these very soon. This traditional fireclay sink has a usefully capacious bowl making it a great choice for a family kitchen and an ideal choice for the utility room.

THOMAS DENBY BY CLEARWATER

HERITAGE

The **Heritage** Farmhouse sinks offer true centrepiece qualities with twin full size bowls which are ideal for performing different tasks simultaneously, such as washing up and food prep. These traditional designs have used a slimmer wall construction which has created a more contemporary aesthetic. Both models are supplied with a tap platform suitable for a Monobloc mixer tap, thus avoiding the need to drill out the work surface.

PROVENCE

The **Provence** sink is the original lay-on design that graced the kitchens of old. It is making a come back as they are simply the most practical form of sink. They totally maximise the area for washing and provide a total wet-area for splashing about!

This will suit traditional kitchens best or make a brilliant choice for the utility sink.

SEATON SMART

The **Seaton Smart** is a hugely capacious fire clay Butler sink - perfect for high-workload kitchens or utility rooms. The Seaton uniquely has two reversible apron fronts; on one side is a traditional plain façade while the other side has an attractive recessed panel for more of a flamboyant statement, choose the one that best suits your theme.

The Seaton has a 'Smart' accessory rail system to accommodate a wooden chopping board that can be positioned along the length of the sink. Also included is a Bowl Grid which helps protect the bowl surface.

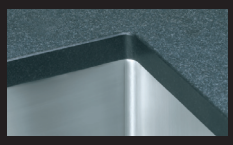
STAINLESS STEEL

Inset

This installation requires the sink to be mounted into the worktop from the above. This installation type is suitable for all types of worktop including laminated chipboard.

Page 77-100



Undermount

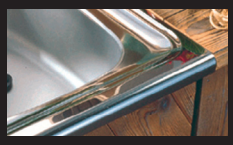
This installation requires the sink to be fitted to the worktop from the underside. This installation type is only suitable for solid surface worktops such as Granite, Marble or Wood.

Page 102-119

Apron Front

In this installation the sink is fitted directly onto a cabinet with its front fascia exposed. This type of installation is only suitable for solid surface worktops such as Granite, Marble or Wood.

Page 120-123



Lay-On

Fit directly on to the kitchen cabinet and are not set into a work-top, thereforemaximising the wet area. Each sink is supplied with twin tap-holes for either traditional pillar taps or deck mixer style taps.

PRODUCT BENEFITS

Stainless Steel remains the most popular medium for kitchen sink production. It's not difficult to realise when you consider it's main attributes:

Heat Resistant
Stainless Steel is highly heat resistant, so much so that hot pans straight from the stove can rest safely on the sink - a highly useful thing when juggling the pasta.

Hygienic
A totally non-porous surface that is easy to keep clean and consequently more hygienic.

Impact Resistant
Stainless Steel is the most forgiving material for impact and is the least likely material to damage your best china or glassware whilst remaining unscathed itself.

Dirt-repellent effect · **Odour-free** · **Heat-resistant 180°C** · **Food-safe**

Hygienic Surface · **Made to last** · **Stain-resistant** · **Impact-resistant**

INSET

The Clearwater Stainless Steel Inset collection is defined in four categories as listed below. The design choice is wide and varied and will suit all budgets and kitchen parameters. All products are produced in 304 grade steel and excellent quality has been maintained throughout this diverse range.

ICONS EXPLAINED

SilentCote®

SilentCote® Protection

Sinks bearing the SilentCote icon are treated with a sound absorbing thermal paint on the underside, reducing noise and increasing durablity.

Pre-fitted Seal

Pre-fitted Seal

Sinks bearing this icon come with a seal already applied to the sink so that the installer does not have to do it by hand.

ZENITH

The **Zenith** sinks radiate cool minimalism with strong geometric lines. This family of sinks offer deeply recessed flat drainers that are sloped for easy drain-off.
The omission of draining ribs compliment the sharp radii corners and maximise the useable work surface and offer easy to wipe down surfaces.
The unusually strong construction has been made possible by using the highest quality 1.6mm thick steel which has been brushed to create a beautiful grained sheen. To further add to this sink's credentials all models have been treated with **SilentCote**® a thermal soundproofing paint.

URBAN

The **Urban** are a very slick range of sinks, the bowls feature 10mm radius corners and smart draining lines enhancing their crisp architectural appearance.

The sinks are manufactured in a 1.2mm steel which has been further reinforced with **SilentCote®**, a special sound-proofing thermal paint (see page 77).

URBAN SMART

The **Urban Smart** sinks are the perfect cook's assistant – custom-fit accessories including strainer colanders and trays can rest on the double-level bowl ledges freeing up hands for food prep tasks such as rinsing vegetables and straining pasta. The top ledge is used for the sliding wooden chopping board and the lower ledge is for the strainer accessories that can also slide for optimum positioning. These bespoke accessories included with the sink truly maximize the Urban Smart's abilities.

The tap-hole employed by the Presto Automatic Waste control can be made available for a secondary tap such as a Filter/Kettle tap or soap dispenser by requesting a manual waste instead of an automatic.

BELLA

SATIN | 0.8mm

The **Bella** boasts a generous size half bowl and has a sharp flat profile edge which appears almost flush to the worktop.

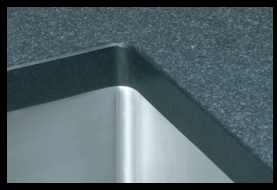
UNDERMOUNT

We offer a huge choice of stainless steel undermount sinks, from soft form to zero radius bowls and compact to capacious; you can be assured you will find the perfect solution for your needs. Also, amongst the undermount pages you will see our Smart series which offer fitted accessories to broaden versatility.



This installation requires the sink to be fitted to the worktop from the underside.

This installation type is only suitable for solid surface worktops such as Granite, Marble or Wood.

VORTEX
UNDERMOUNT

The **Vortex** is the next generation of undermount sinks combining a bowl with a drainer. This is a perfect solution for those who want the modernity and sleek looks that undermounts provide but want to avoid using the worktop as a drying area. This is a single-piece handcrafted sink that sits beautifully beneath a solid surface worktop offering sophistication and practicality.

JAZZ
UNDERMOUNT/INSET

The **Jazz** offers amazing value for money when you consider its excellent credentials. Constructed from a robust 1.0mm stainless steel and treated with **SilentCote®** for added hushed tones when in use. Fine radius corners for an ultra-contemporary aeshetic, a brushed grained finish with smart draining lines on the bowl floor to aid rapid draining.

The decorative graining extends to the normally unseen rim which means all models can be installed in both undermount and inset formats as well.

STARK SMART
UNDERMOUNT/INSET

The **Stark Smart** sinks have an ultra-contemporary style with zero radius bowls. They have been designed with the cook in mind with built-in accessory ledges which house custom-fit accessories. These include a wooden chopping board which is supplied with each sink and an optional strainer colander and strainer tray. These sit snugly on their ledges freeing up both hands for tasks such as rinsing vegetables and straining pasta.

The Smart accessories have transformed the Stark from a humble sink into a clever workstation.

VOLTA
UNDERMOUNT/INSET

The **Volta** has fine radius corners and smart draining lines creating a very modern statement. There are six options to choose from, including two versatile 1.5 bowl models which feature a unique slim bowl divider reinforcing the Volta's sophisticated design.

The Volta is manufactured in 1.0 thick steel which has been treated with **SilentCote**® to enhance its robust qualities and provide hushed tones when in use.

See the PVD Volta Sinks on pages 114-115

Dura Finish

A unique random brushed effect providing a rich patina that disguises scratches.

This prolongs its original looks beyond other finishes.

Brass

Copper

Volta PVD Properties

- Higher resistance to scratches and abrasions.
- Higher corrosion resistance.
- High resistance to domestic chemicals and cleaners.
- Hygienic surface – suitable for food contact.
- Enhanced decorative finish.

VOLTA PVD
UNDERMOUNT/INSET

The **Volta PVD** range is our latest elegant range of bowls that can be fitted in both under-mount and inset applications. The bowls have crisp 5mm radius corners and stylish pressed draining-lines. They are all available in Brass, Bronze and a very chic Black finish (see over page).
These special finishes are created using a PVD process that provides an extremely resilient surface. The Dura-Brushed finish is a unique random brushed effect, providing a rich patina that disguises scratches and prolongs its original looks.

The Volta 1.5 model features a slick, ultra-slim bowl divider that maximises the bowls capacity whilst retaining an overall compact dimension, ensuring that it fits into 60cm wide cabinetry.

All models have been constructed in 1.0 mm stainless steel and coated with **SilentCote**® on the underside for increased sound-proofing.

NANO COATING

Nano Coating is the process of applying an ultra-thin surface layer which gives the product a mechanically flat surface. Which repels dry particles, water, oil, and dirt. Resulting in a product that is dirt repellent and more hygienic, easier to clean and more resistant to scratches and chemicals. Other benefits include a reduction in grease and finger marks.

Properties

- Dirt Repellent and Hygienic
- Hydrophobic
- Chemical Resistance
- Ultraviolet Resistance
- Reduces Grease and Finger Marks

Volta VL650BL shown as under-mount with Tutti Twist & Spray tap in Matt Black - *see page 173*

VOLTA PVD
UNDERMOUNT/INSET

The **Volta PVD Black** is black - not compromised tones of dark grey that is usually on offer. This pure colour creates a very sophisticated presence in the kitchen and is certainly statement making. The PVD properties add a very resistant surface and the Volta Black has also been treated with Nano technology. This has created a uniquely smooth surface which is not only dirt repellent but is extremely hygienic.

These sleek sinks are fabricated in 1.0 steel and have been treated with **SilentCote**® to increase the robustness and add hushed tones when in use.

The 1.5 bowl model has a very slim bowl divider adding a very contemporary aesthetic whilst maximising the bowl dimensions.

APRON FRONTED

Our stainless steel Apron Fronted range consists of the ever popular **Belfast** shown on this page and the fabulous double bowl **Infinity Smart** which uses an integrated ledge to incorporate a range of useful accessories.

In this installation the sink is fitted directly onto a cabinet with its front fascia exposed.

This type of installation is only suitable for solid surface worktops such as Granite, Marble or Wood.

BELFAST

This fabulous incarnation of the traditional ceramic Butler sink transports an old classic to the 21st century with great style.

The **Belfast** has lost none of the capacious dimensions of its ceramic cousin and is an ideal choice for the cook's kitchen as it can take on the largest pans and trays with ease.

Infinity INS003 showing the low partition flood wall

INFINITY SMART

The **Infinity Smart** Butler sinks create a lustrous focal point in the kitchen, the architectural aesthetics are enhanced by the slender front apron which disguises the true depth of these sinks adding to their sophisticated appearance.

All models have a unique integrated ledge to accommodate an essential range of accessories that maximize the Infinity Smart's abilities. Please note the 1.5 bowl model has low partition wall which allows both bowls to be flooded to create a larger washing area.

Replacement Filter Cartridges

Pure Filter Tap Filter
Ref. P6C1 £59
Each filter delivers 3800 litres of filtered water at a fraction of the price of bottled water.

Filtered water untainted by the taste of heavy metals, limescale and chlorine results in fresh, great tasting water straight from the tap.

Sold with filter taps pre April 2026.

Benefits of the Clearwater F6C1-UF Filter:

- **Ultrafiltration Membrane:** 0.01- 0.04 microns. This incredibly fine filtration effectively removes very small particles Including micro plastics and pathogens.
- **Improved Taste and Odor:** The carbon block effectively removes chlorine, leading to better-tasting and smelling water.
- **Scale Prevention:** The KDF 55 media helps to prevent limescale buildup in appliances.
- **Retains Natural Minerals:** Unlike some other filtration methods, this filter allows beneficial minerals to remain in the water.
- **Effective Against:** Reduction of levels of lead, cysts, iron, arsenic V, and microplastics.

Both of these filters are suitable with Clearwater Kettle Hot and Filter taps.

Filter Cartridge (6 month)
Ref. F6C1-UF £64
This filter has a 6 month life span and a capacity of 4000 litres.

Filter Cartridge (12 month)
Ref. F12C1-UF £114
This filter has a 12 month life span and a capacity of 7600 litres.

Operation: Manual - front pull-out
With runners & ball bearings
Fixed lid
Warranty: 2 years
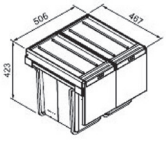
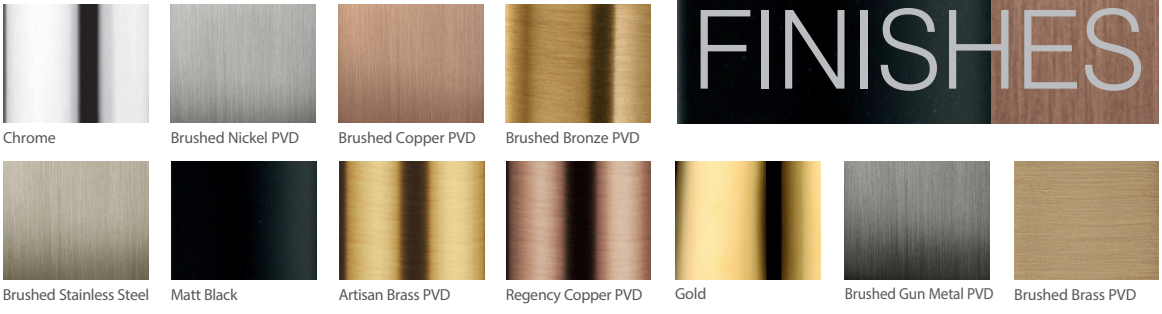
Conforms to the code for sustainable homes - 2 credits



TAPS
CHOICES

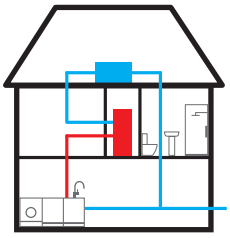
FINISHES



WATER PRESSURE - IDENTIFY YOUR SYSTEM

To be sure you get the best performance from your tap you need to identify the plumbing system in your home to be able to determine the water pressure there.

Use the following information as a guide to help you to do this, it is recommended that you get the opinion of a professional tradesman who can check the pressure with a pressure gauge.

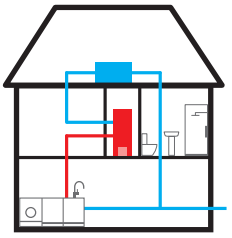


Gravity Fed (Low pressure) Systems

- Cold water storage tank in loft
- Hot water cylinder in airing cupboard
- Hot water pressure is calculated by measuring the height from the storage tank to the tap

  Example

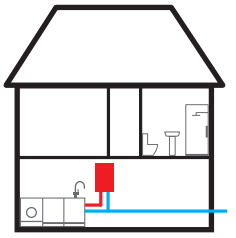
  1M drop = 0.1 bar pressure
  2M drop = 0.2 bar pressure
  5M drop = 0.5 bar pressure



Boosted Gravity Fed Systems

- Cold water storage tank in loft
- Hot water cylinder in airing cupboard
- Hot water pressure is determined by a separately fitted pump (refer to manufacturers specifications)

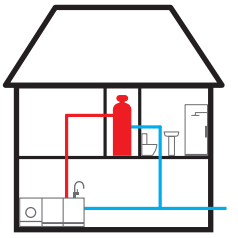
  Usual pressure 1-3 bar



Combination Boiler Systems

- A combi boiler delivering hot and cold water on demand
- No storage tanks
- No shower pump
- Hot water pressure is dictated by the mains pressure and power of the boiler

  Usual pressure between 1 and 1.5 bar



Mains High Pressure Systems

- Unvented cylinder with expansion vessel (eg 'Megaflo')
- No cold storage tanks
- No shower pump
- Hot water pressure is dictated by mains pressure

  Usual pressure between 2 and 3 bar

All taps are shown with a minimum operating pressure symbol as below. Use this symbol to select the correct tap for your water system; for example if you have a gravity fed system with a 5 metre drop you will have 0.5 bar pressure and you should choose a minimum 0.5 bar tap or lower. If you have a high pressure system for example 3 bar you can choose any of our taps.

TAP ICONS

Throughout the following Tap Sections you will see these icons next to products where relevant.

ClearFlow
The combination of crystal-clear water, non-splash hi flow rate even at low pressure.

Dual Flow
Keeps the flow of hot and cold water separate in the tap Spout.

Minimum Operating Water Pressure

Maximum Spout Swivel

The Cascade SLC
aerator offers anti-limescale features, with a rubber face to prevent scale amalgamation, simple to clean with just a gentle rub.

Cold Start
Energy saving cartridge means when the lever is in the vertical position, it only dispenses cold water and not mixed. Forward rotation avoids the lever hitting the splashback.

Pull-out Aerated Spray
Increases operating range of the tap supplying a single aerated flow.

Pull-out Dual Flow Spray
Increases operating range of the tap and provides easy switching from aerated flow to needle spray.

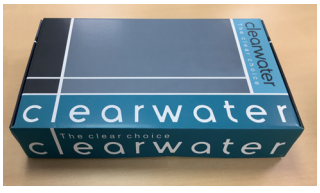
Professional Dual Flow Spray
360° flexible spout with easy switching from aerated flow to needle spray.

Professional Single Flow
360° flexible spout with single aerated flow.

Twist & Spray
A simple twist of the spout flange will change the water from aerated to needle jet flow.

WARRANTY

We offer a 5 year warranty from date of purchase on all working parts and valves for our taps, decorative surfaces are guaranteed for 1 year from purchase date providing care instructions have been followed and in particular no scouring agents have been used.



PACKAGING

All our taps are supplied in robust boxes with protective foam individually protecting the tap and its separate parts, thus ensuring your tap arrives complete and in perfect condition.

KETTLE TAPS

FILTERED KETTLE HOT WATER ON TAP

Once you have one, you'll wonder how you ever lived without it.

Filtered 98°C water
Filtered cold water

KETTLE TAP BENEFITS

SPEED

No more waiting for the kettle to boil - 98° hot filtered water is always instantly available. It takes up to 5 minutes to boil a litre of water using an electric kettle, it takes zero minutes using a Kettle tap.

TASTE

The water before entering the boiler is filtered to remove impurities, resulting in fresh odourless 98° hot water for superior tasting drinks.

WATER SAVING

You only dispense the precise amount of hot water you need, so you save on water and energy consumption. All our Kettle Tanks have a built in filter alert that lets you know when the filter needs replacing.

SAFETY

All our Kettle taps come with insulated spout technology and child-safe controls.

CLEAR THE DECKS

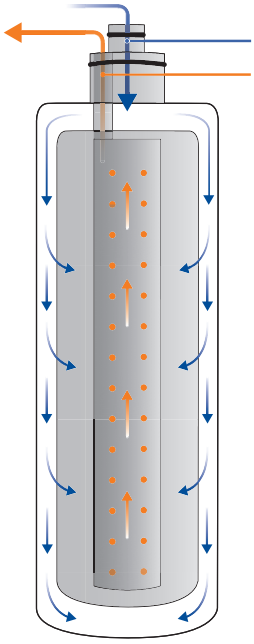
Declutter your work surfaces by ditching your kettle, all your boiling water requirements are fulfilled with a Kettle tap.

DIGITAL THERMOSTATIC BOILER

Temperature Control

Ten precise temperature settings between 45°C and 98°C

F6C1-UF Filter



The **Clearwater F6C1-UF** delivers cleaner, safer and noticeably better-tasting water through a high-performance three-stage system designed to address today's most pressing water-quality concerns.

Its ultrafiltration membrane (0.04 microns) is up to 3,000 × finer than a typical jug filter, reducing PFAS "forever chemicals," microplastics, pathogens, heavy metals and fine particulates. A carbon block stage then removes chlorine, odors and off-tastes for a crisp, refreshing finish, while KDF 55 media inhibits limescale without stripping essential minerals like calcium and magnesium—supporting healthier hydration and protecting appliances.

The **F6C1-UF** provides a simple, future-ready way to cut exposure to modern contaminants and enjoy consistently pure water straight from the tap.

MAGUS 3

The Clearwater **Magus** 3 IN 1 Kettle tap combines great aesthetics with outstanding functionality making it an indespensable time-saving appliance in the kitchen. Its versatility means it dispenses domestic hot and cold water as well as 98°C steaming hot, filtered water .

This brilliant kitchen assistant means no more waiting for the kettle to boil and instead you have immediate kettle hot perfectly tasting water for beverages and cooking.

FUNCTIONS

- **3 Functions** - domestic hot, domestic cold, 98°C filtered water.
- **Child safe operation** - spring loaded lever dispenses 98°C filtered water.
- **Cool touch spout** - centrally insulated 98°C channel ensuring spout remains safe to touch.
- **Filtration** - protects the boiler from limescale; removes contaminants, improves taste/odour. Ultrafiltration removes bacteria/viruses and micro-plastics for pure drinks.

FILTER CARTRIDGE

The filter cartridge included has a 6 month life span and a capacity of 3800 litres.

Replacement Cartridges
Ref. F6C1-UF £64 - WRAS Approved

An optional filter with a 12 month life span is also available with a capacity of 7600 litres.

Ref. F12C1-UF £114 - WRAS Approved

DIGITAL THERMOSTATIC BOILER

- **2.4 Litre capacity** - instant kettle hot water, capable of providing 60 cups per hour.
- **Simple installation** - non-specialist fittings uses standard 13 amp plug.
- **Anti-scale filter provided** - reduces lime-scale and improves water quality.
- **State-of-the-art Digital controls** - accurate to 0.5 degrees variable.
- **Quiet Operation** - no disruptive noise.
- **State-of-the-art Digital controls** - accurate to 0.5 degrees variable.
- **10 temperature settings** - from 45° to 98°.
- Operates from 1.5 bar.
- Ultra compact design.
- Automated Filter Reminder System.
- 2 year warranty.

LONGDON 4

The **Longdon** hides some very smart tech behind its softly sculptured exterior - its 4 in 1 technology is controlled by two elegant ceramic levers, these dispense 98 degree hot and cold filtered water for drinks and cooking as well as a standard domestic hot/cold supply. The curvy aesthetic of the Longdon allows this versatile tap to be at home in both modern and traditional settings and with its ceramic levers make a perfect alliance with fireclay sinks. It is available with an incredibly useful matching handspray, see page 263 for more info.

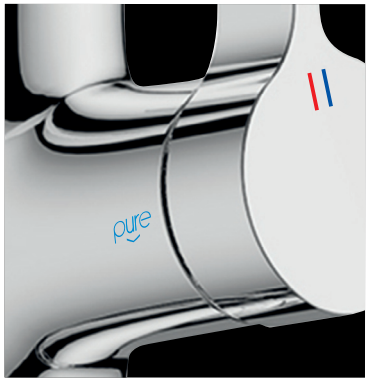
FILTER TAPS

TAP INTO HEALTHIER GREAT TASTING FILTERED WATER

The filtered water tap is fast becoming a common feature in today's modern kitchen.

The high performance filters transform standard tap water into fresh clean tasting drinking water so efficiently that the filtered water cannot be distinguished from bottled mineral water.

The cost saving is considerable compared to purchasing bottled water and also saves time and energy carrying heavy bottles from the supermarket. Using a filtered tap is also environmentally friendly thus avoiding the disposal of endless plastic bottles.



FILTER TAP BENEFITS

TASTE

The Pure Filter removes impurities to give the water a great taste to rival bottled mineral water. The filtration transforms tap water giving a pure untainted taste.

HEALTH

Drinking filtered water with all impurities removed and the healthy minerals left adds to the health-giving properties compared to standard tap water.

CHILLED

Our chilled units can further add to the pleasure of filtered refreshing water, simple to fit under the sink giving constant chilled/ filterered water.

Pure Chiller 100

ENVIRONMENT

Aside from the inconvenience of carrying heavy bottles home from the supermarket, there is the added benefit of not adding to the growing plastic waste epidemic that is choking our planet.

ECONOMY

Why spend a fortune on bottled water when equally good tasting water is simply on tap and virtually free to use.

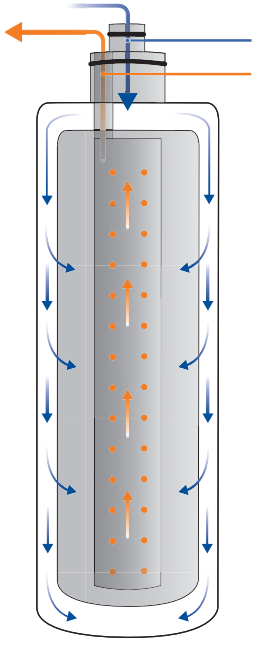
APPLIANCES

Prolong the life of your steam iron and kettle by filling with filtered water to avoid limescale build-up.

FILTER REPLACEMENT

To maintain a supply of great tasting water it is important to replace the filter after 4000 litres have been used, we supply, with each tap, a Pure FlowPro digital reader which will remind you when it's time to change. It is easy to replace the filter by a simple twist off and twist on process, no plumbing skill required!

F6C1-UF Filter



The **Clearwater F6C1-UF** delivers cleaner, safer and noticeably better-tasting water through a high-performance three-stage system designed to address today's most pressing water-quality concerns.

Its ultrafiltration membrane (0.04 microns) is up to 3,000 × finer than a typical jug filter, reducing PFAS "forever chemicals," microplastics, pathogens, heavy metals and fine particulates. A carbon block stage then removes chlorine, odors and off-tastes for a crisp, refreshing finish, while KDF 55 media inhibits limescale without stripping essential minerals like calcium and magnesium—supporting healthier hydration and protecting appliances.

The **F6C1-UF** provides a simple, future-ready way to cut exposure to modern contaminants and enjoy consistently pure water straight from the tap.

ZUBEN

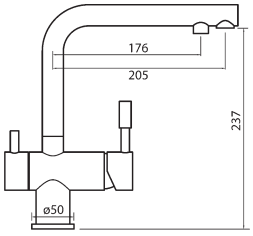
A sleek cruciform style filter tap in solid stainless steel providing a wonderful enduring lustre.

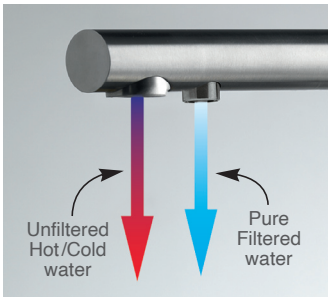
Zuben mixer and cold Filter with 'L' swivel spout.

Ref. ZU2SS Stainless Steel **£490**

Included: Filter Cartridge, Connectors and Pure FlowPro

REG4 Approved





PURE CHILLER 100

For superior tasting water, the **Pure Chiller 100** is an additional feature that can be combined with the Magus 4 or any of our Filter Taps. It has a patented silver turbo clean system which generates a water vortex on the internal walls whenever water is dispensed, so preventing biofilm formation. In addition, the sealed stainless steel cooling chamber is welded together using silver, a material well known for its antibacterial properties.

Thus providing pure crisp chilled water on demand directly from your tap.

- **Icebank system for superior chilling**
- **Simple & quick installation**
- **Compact design**
- **Up to 15 litres per hour of chilled water - between 3° and 10° C**
- **1.5 bar minimum**
- **Width 26cm Depth 23.5cm Height 40.7cm**
- **2 year warranty**

Ref. Pure100 £869

SENSOR TAPS

Sensor taps free-up your hands so you can speed through daily chores such as washing, cleaning and food prep whilst maintaining a more hygenic environment. No need to touch the tap when your hands are full or you have been prepping raw meat - just a simple wave of your hand or an object such as a pan or a utensil will activate the sensor to turn the water flow on and a further movement within 10cm of the sensor will turn it off.

These state-of-the-art taps are an invaluable kitchen assistant that will create a more germ-free work zone.

- **INTELLIGENT MOTION TECHNOLOGY**
  Reliable touchless on/off operation
- **PRECISE ACTIVATION ZONE**
  Utilises state-of-the-art sensor to prevent false activations
- **DUAL OPERATION**
  Optional manual and Touchless control
- **BATTERY OPERATED**
  No power supply necessary

GALEX MOTION

The **Galex Motion** touchless tap combines beautiful design and smart technology which enables you to speed through tasks at the sink without having to touch the tap thus avoiding the spread of germs.
The Motion™ technology will respond by a simple movement of a hand or object .
The sensor operates within 10cm to avoid unintentional activation.

TWIST & SPRAY®

These taps are fitted with the unique **Twist & Spray** aerator which provides two flow types that can be changed with a simple twist of the flange. The pleasing high quality movement clicks from a non-splash aerated flow to a needle jet-spray that is ideal for jobs such as rinsing plates and food preparation. The needle-jet mode can also generate detergent bubbles far more easily than an aerated flow, particularly in today's water regulated taps.

The Twist & Spray has greatly widened the standard tap's range of abilities in one simple twist.

The **Pull-Out Spray** is an incredibly useful tool for all manner of jobs, from rinsing off crockery prior to the dishwasher, rinsing veg and salads and cleaning down the sink.

Once you have one you will never be without one again!

They make a particularly valuable kitchen aid when partnered with non-pull out and professional taps when there is no facility for a directable flow.

There are two flow types at cold mains pressure:

Aerated - ideal for vessel filling and gentle rinsing of delicate food.

Needle-Jet - for rinsing the crockery prior to dishwasher, food preparation - washing salads and rice etc and rinsing around the sink bowl and drainer after use.

- 60cm working range with auto-retract hose
- Twin flow types: Aerated, Needle-Jet
- Auto lock for hands-free operation
- Mains pressure cold flow – variably controlled
- Five finishes perfectly matched with the Clearwater modern and traditional ranges

TRADITIONAL

Timeless Elegance, Modern Performance

Step back in time without sacrificing the convenience of the present. Our Traditional Tap Collection is a curated gallery of high-quality reproduction period pieces, designed to bring a sense of nostalgic charm and architectural heritage to the heart of your home.

While these taps draw inspiration from the graceful silhouettes of the past, they are engineered for the demands of the modern kitchen. Beneath the vintage exterior lies the same advanced ceramic disc technology found in our contemporary ranges, ensuring smooth operation, drip-free performance, and exceptional durability.

Heritage Finishes

To truly honour their historical pedigree, every tap in this collection is available in a selection of rich PVD finishes. These aren't just surface coatings; Physical Vapor Deposition (PVD) provides an incredibly hard-wearing, fade-resistant lustre and our finishes are designed to complement the authentic character of a traditional kitchen.

ICONS EXPLAINED

Minimum Operating Water Pressure
See full water pressure guide on page 133.

Maximum Spout Swivel

Dual Flow
Keeps the flow of hot and cold water separate in the tap Spout.

Twist & Spray
A simple twist of the spout flange will change the water from aerated to needle jet flow.

Pull-out Aerated Spray
Increases operating range of the tap supplying a single aerated flow.

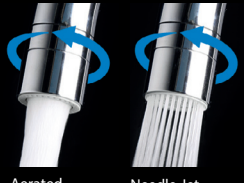
SPECIAL FEATURES

TWIST & SPRAY™



Some taps in this section are fitted with the unique **Twist & Spray** aerator which provides two flow types that can be changed with a simple twist of the flange. The pleasing high quality movement clicks from a non-splash aerated flow to a needle jet-spray.

The Twist & Spray has greatly widened the standard tap's range of abilities in one simple twist.

PVD COATING

Helps to withstand surface damage and provides a more hygienic surface.

SOAP DISPENSERS

BROADWAY PULL-OUT

The **Broadway** pull-out bridges the gap between vintage aesthetics and high-performance utility. It's a rare find; a classic mixer that integrates a discreet pull-out rinse, dramatically broadening versatility without compromising on retro style.

- The integrated pull-out spray makes light work of rinsing delicate produce or cleaning those hard to reach corners of a deep Belfast sink.
- **Low-water pressure:** Unusually the pull-out operates on low water pressure which means it can be fitted into older houses with dated water systems.
- **All metal construction:** Eschewing the standard ceramic handles, the Broadway features solid metal twin levers for a tactile, industrial-luxe feel that is built to last.
- **PVD Heritage Finishes:** Available in four finishes, including PVD metals that enhance the tap's vintage pedigree while offering superior scratch resistance.

LONGDON POT FILLER

The **Pot Filler** is an invaluable addition in most professional kitchens negating the chore of moving heavy water filled pots from sink to hob. The Longdon Pot Filler with its smart high-tech aesthetic really add that professional touch.

The high quality engineered stainless steel construction ensure the Longdon will be an invaluable lifelong assistant for the busy caterers amongst you.

Longdon Features

- **Reach & Range:** Dual-jointed swing arm that will reach multiple burners on range cookers and folds flat neatly against the wall when not in use.
- **Ergonomics:** Install directly over the hob eliminating heavy lifting from the sink.
- **Dual shut-off valves:** One at the wall and one at the nozzle prevents accidental drips over the hob.

Technical Considerations

- Requires a cold water feed behind the backsplash (usually 30-46cm above the cooktop).

KWC EVE

The **KWC Eve** collection are a shining example of creativity and innovation. The unique combination of the highest quality metals combined with the play of light and water result in a most seductive form.

This beautiful tap is available with or without lighting and is made in four finishes:
Solid Stainless Steel, Chrome or a new Black Chrome and a particularly velvety White which perfectly matches Corian surfaces.

These new finishes now provide greater scope for creative freedom.

Pull-down Aerator
With or without light element, every Eve has a pull-down aerator with a length up to 60cm.

A powerful light source
Light emitting diodes integrated into the light ring will last for years and use very little power.

Simple operation
Just press the button on the side of the aerator and the light play can begin. If you forget about the light, ILLUMINAQUA® switches off automatically after 45 mins.

KWC KIO

The **Kio** is the latest generation of taps from KWC. There are two manual control models, one with a standard swivel spout, the other with a pull-out spray, while the star of the range is an electronic control model with the latest touch control technology.These taps are available in three finishes, chrome, stainless steel and matt black, that offer a distinct choice that can be coordinated with most room styles. The KWC material and build quality becomes even more evident when you start using one of these super taps.

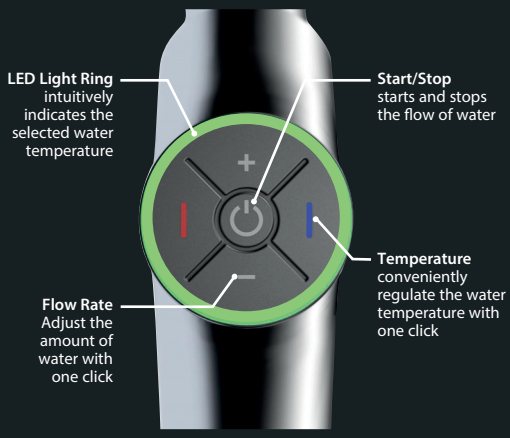
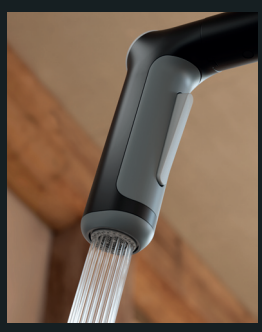
KWC KIO-E

DESIGN AWARD 2021

The **KIO-E** uses the latest electronic LED technology which means both water flow and temperature can be controlled with a touch of a button. The LED light glows red and blue to denote the water temperature. This smart tap is also programmable to perform functions such as hygiene flushing , temperature calibration and automatic switch-off. The ergonomicaly designed pull-out spray-head has an anti-slip silicon grip for ease of use and with an integrated button to switch between two flow options.



Laminar clear flow



Needle spray flow

KWC LUNA-E

The **Luna-E** family of taps come in two forms; with either side lever control or top lever control.
Both these variants offer standard swivel spout and pull-out spray spout options.

These taps are available in two finishes, chrome and matt black, that offer a distinct choice that can be coordinated with most room styles. The KWC material and build quality becomes even more evident when you start using one of these super taps.

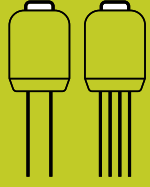
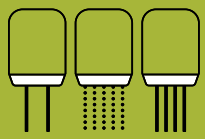
SprayClean
Actively helps with the removal of limescale: With a special faceplate and fastening mechanism, SprayClean prevents limescale buildup.
Any deposits are sprayed away automatically when the water is running.
The special fastening mechanism helps with more stubborn lime deposits: simply turn, clean, and the job is done.

PowerClean
The spray you want at the touch of a button: PowerClean makes it exceedingly easy to switch the flow of water on the spray head – from a standard spray to a fine needle spray.



KWC DOMO 6

The **Domo** family combine top lever and side lever models and a choice of pull-out spray models offering the latest 'Tripleclean' flow technology.
This new generation of taps are refined with assured KWC Swiss quality that are a pleasure to use with their ergonomic design.



TripleClean
Three water streams for more flexibility: TripleClean allows you to change between a normal stream for filling glasses, a soft spray for gently cleaning food, and a power spray for pre-rinsing and removing dirt from dishes.

KWC ONO highflex
extended water system

The **Highflex** are the latest generation of semi-professional taps. They are smaller in scale than their predecessors and have been totally modernised to suit contemporary domestic kitchens resulting in probably the most stylish multi-purpose tap available anywhere.

A spring hose that defies gravity and will remain in its set position for the task in hand.

KWC LIVELLO

The **Livello's** restrained elegant design will ensure this latest range from KWC as timeless classics. As with all KWC taps the Livello benefits from the highest quality materials and typical precision Swiss workmanship thus ensuring a long and trouble-free life.

Choose between the standard swivel spout or the ever popular pull-out aerator model.

- Please note the handle spec change with stainless steel models.

Practical, ergonomic, beautiful: the lever controls the water flow and allows you to switch from cold to hot in one fluid motion.

The integrated Neoperl Cache is easy to remove using the key supplied - and can be cleaned in no time at all.

The pull-out spout adds 60 cm to the tap's reach and can swivel a full 360° - making it an ideal choice for an island installation.

KWC SIN

A stunning range of taps that combine elegantly sculptured curves with high precision engineering. The **Sin** consists of two family members - most distinctive is the highflex® semi-professional model which has a unique patented sprung hose that remains in its set working position for the task in hand. While its sister model employs the ever useful pull-out spout that also benefits from a twin-flow mode.

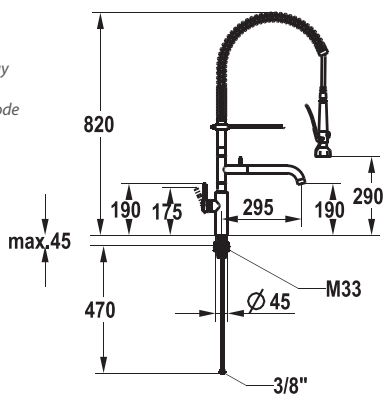
Swivel spout
2 Jet types
SprayLock - *lockable jet spray*
PowerClean - *needle spray mode*
Mounting hole size ø35mm



HOUSE OF ROHL

PERRIN & ROWE
MAYFAIR LONDON

www.perrinandrowe.co.uk

BRASSWARE FINISHES

STANDARD FINISHES:

Chrome is the most durable finish. It will maintain its lustre even with frequent cleaning. However, it is prudent to avoid harsh cleaning products which may contain corrosive chemicals.

Nickel & Pewter finishes will gently age over time.

Gold is a luxury finish made using 24 Carat Gold. It is a softer finish than chrome and more easily scratched. It should be treated as you would treat any piece of fine jewellery.

English Bronze is another delicate finish that should be looked after with care. The finish is produced using a special lacquer coating that may scratch if mistreated.

Chrome (CP)
A brilliant silver with a hint of blue.

Nickel (NI)
A shiny finish with a golden glow.

Pewter (PF)
A brushed nickel with a matt appearance.

Gold (IG)
Plated with 24 carat gold, pure yellow in colour, with a natural glow and high shine.

English Bronze (BZ)
A metallic brown finish with subtle notes of orange and copper.

Add finish suffix to reference when placing order.

SPECIAL / LIVING FINISHES:

Are unlacquered and will develop an individual patina as the brass reacts with its environment. Watermarks will appear almost immediately, and these will mature into a unique, dappled finish. Patina is a chemical process that may occur weeks after manufacturing, therefore products could be received with this added charm having already started.

Polished Brass (BR)
A warm finish with coppery undertones.

Satin Brass (SB)
A matt finish with strong undertones of yellow ochre.

Aged Brass (AB)
An unlacquered 'living finish' which will change as it reacts with its environment and daily use.

PATINA EXAMPLES:

The following images represent the patina effect on our living brass finishes.

PERRIN & ROWE
MAYFAIR LONDON

FILTER TAPS

Although the **Perrin & Rowe** filtration collection may be a new arrival in the filtration market, the technology behind the product derives from the world's first three-way tap, delivering not only hot and cold water but also filtered water through a dedicated waterway – a system that ensures the filtered water is not cross-contaminated by the standard mains hot and cold water.

KETTLE HOT TAPS

Once you have one, you'll wonder how you ever did without it. No kettles, no leads, no clutter, no fuss... Just 98° C of steaming hot water or cold filtered water at the flick of a lever. With their elegantly sleek lines, Insinkerator models don't just bring style to the kitchen; they bring a level of convenience that fits today's busy lifestyles.

The GN1100, GN2215, H330 & 3N1 models produces hot filtered water, while the HC1100, HC2215 & HC300 offers both hot and cold filtered water from the same tap. Both feature an unobtrusive filter system under the sink that reduces chlorine, lead, turbidity and other unpleasant tastes and odours.

They only heat the water you use, making the household more energy efficient. The HC1100 tap with the added cold filtered water feature provides a cost effective alternative to buying bottled water. All taps have a 5 year warranty.

The hot water boiler and initial filter are included with the tap.
The boiler has a 2 year warranty.

1100 SERIES

The **1100 series** have a café chic design and will sit discreetly in the kitchen providing an invaluable service.Includes Hot Water and Filter System and safety control on levers. **WRAS Approved**

Waste Disposers

Cleaner, more convenient and environmentally responsible

Fast becoming the must-have sink appliance for today's modern kitchen.
At the touch of a button, food waste is dealt with hygienically and instantly - rather than leaving it in the bin to encourage smells, bacteria and insects.

Waste disposers don't just offer practical convenience, they provide an environmentally sound answer to the growing problem of food waste.

Villeroy & Boch
1748
10 YEAR WARRANTY ON ALL SINKS

Ceramics from Villeroy & Boch combine the experience of traditional craftmanship with maximum industrial precision. The result: products that enrich life with good design, lasting quality and with an assured sense of style. Kitchen sinks from Villeroy & Boch combine practicality and design with the tried-and-tested qualities of ceramics, which are offered by almost no other material.

ARCHITECTURA

Ceramic Plus

The **Architectura** is a recent V&B creation. These additions to the range are an ideal choice in the kitchen for both contemporary or traditional settings, the unusual tapering four-flute draining channels create a very smart look indeed.

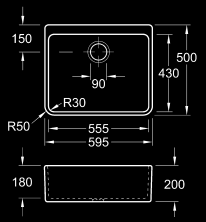
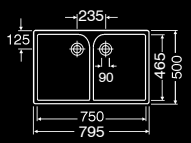
FARMHOUSE 60

This is a timeless classic but has been given a modern twist with finer lines that allow it to grace both traditional and contemporary kitchens.

Farmhouse 60 Single bowl
Ref. 63229501 White **£461**
Standard Waste Ref. VBW £33
Installation: Apron Front
Overall size: 595/500 mm
Bowl size: 555/430/180 mm
Minimum cabinet size: 600 mm
Tap-Holes: No
Overflow: Yes



FARMHOUSE 80

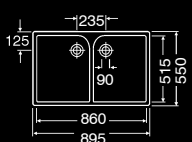


Farmhouse 80 Double bowl
Ref. 63319501 White **£611**
Standard Waste Ref. VB2W £62
includes Plumbing Kit

Installation: Apron Front
Overall size: 795/500/220 mm
Minimum cabinet size: 800 mm
Tap-Holes: 1 (pre-scored)
Overflow: Yes

FARMHOUSE 90

Both models (80 & 90) offer a supreme capacity for cleaning and food preparation. The **Farmhouse 90** is particularly excellent in swallowing up the increasingly large oven trays.



Farmhouse 90 Double bowl
Ref. 63329501 White **£732**
Standard Waste Ref. VB2W £62
includes Plumbing Kit

Installation: Apron Front
Overall size: 895/550/220 mm
Minimum cabinet size: 900 mm
Tap-Holes: 1 (pre-scored)
Overflow: Yes

BUTLER 90

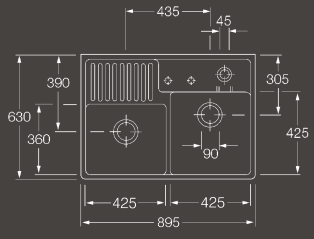
Ceramic Plus

The **Butler 90** combines huge practicality with it's generous multi-bowl system. The exuberant styling really sets this sink apart from its peers. The sink is supplied with 1 tap hole, which can be covered or used for soap dispenser/pop-up waste when using wall mounted taps.

Optional Accessories

Wire Basket (for 0.75 bowl)
Ref. 8341 00 K1 £141

Strainer Bowl (transparent)
Ref. 8323 00 K2 £46



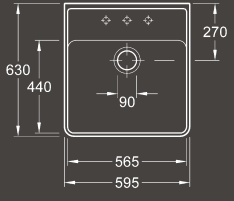
Butler 90 1.75 bowl
Ref. 6323 91 R1 White Alpin **£1026**
Ref. 6323 00 KT White Pearl **£1196**
Standard Waste Ref. VB2W £62
includes Plumbing Kit

Installation: Apron Front
Overall size: 895/630/220 mm
Bowl size: 425/425/180 mm
Second bowl size: 425/360/180 mm
Minimum cabinet size: 900 mm
Tap-Holes: 1 (left) 1 (pre-scored, right)
Overflow: No

BUTLER 60

Ceramic Plus

The **Butler 60** has a useful rear ledge with three semi-prepared tap-hole positions, so a monobloc, Bridge mixer or 3-hole mixer can be used.



Butler 60 Single bowl with tap ledge
Ref. 6320 60 R1 White Alpin **£622**
Ref. 6320 00 KT White Pearl **£762**
Standard Waste Ref. VBW £33

Installation: Apron Front
Overall size: 595/630/220 mm
Bowl size: 565/440/180 mm
Minimum cabinet size: 600 mm
Tap-Holes: 3 (pre-scored)
Overflow: Yes

Butler 60 showing the White Pearl design

Sensio Series 1 Lighting
This new range of lighting from Sensio offers a range of simple, high quality LED lights.
The products come in one colour, in one finish, in one pack size complete with a driver.

Series 1 is simplicity without the compromise.

Warm White 3000K

- An innovative bendable flexible strip that handles corners with ease
- A unique PCB board cut in a 'zig-zag' shape provides superb flexibility allowing you to bend the light around a corner
- Can be bent around 90 degree corners without the need for corner cables or starting a new run of strip
- The entire reel can be used with cut marks indicated every 50mm avoiding wastage
- Cut sections are re-utilised with the joining clips and leads (sold separately)
- Compatible with Sensio single-colour receiver to enable dimming functionality
- Supplied with 3M VHB (Very High Bond) adhesive tape backing for secure installation
- IP20 rated - protected against solid objects over 12mm (e.g. fingers)
- Supplied in a 5m reel

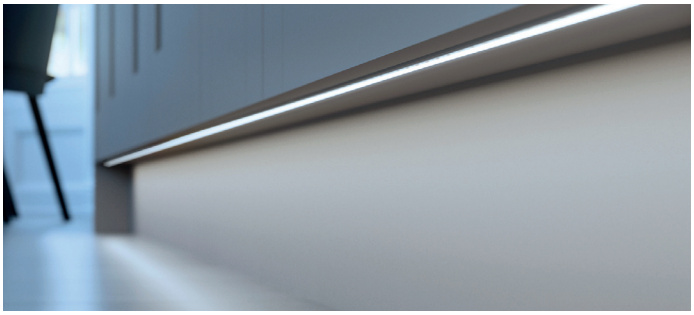
POLAR X - Free Cut LED Flexible Strip

PLINTH



- Provides a completely diffused line of light with no visible LED dots eliminating the need for a profile or cover
- Chip on Board technology provides superior light output
- Excellent thermal conduction resulting in a cool running strip
- Superb light output with high lumen per watts
- 24V allows long runs of light without any light fade
- Compatible with Sensio single-colour receiver to enable dimming funtionality
- Supplied with pre-soldered, 1.5m driver connection cables with a 2-pin connector at each end of the strip (2m reels one lead and connector only)
- Can be cut to length (every 31mm) and the whole reel can be utilised with the Polar Joining Clips (sold separately)
- Supplied in a 5m reel (and 2m in natural white only)
- Very High Bond adhesive tape backing for secure installation
- Compatible with the Universal Profile range

POLAR X PRO - Free Cut Flexible CCT LED Strip

- A superior, colour temperature changing, flexible strip
- Chip on Board technology provides superior light output
- Correlated Colour Temperature (CCT) allows the perfect light temperature selection and transition from warm to cool light temperatures
- Chip on Board (COB) technology provides superior light output
- Excellent thermal conduction resulting in a cool running strip
- 24V allows long runs of light without any light fade
- Compatible with Sensio CCT Receiver and Universal Remote Control or the Titan Smart Kinetic Driver to control, zone and dim the lights
- Supplied with pre-soldered, 2.5m driver connection cables with 4-pin connectors at each end of the strip
- Additional connector cables and accessories available (sold separately)
- Very High Bond adhesive tape backing for secure installation
- Can be cut to any desired length along the copper strip
- Supplied in a 3m, 5m and 10m reel
- IP Rating: IP20

SPECIFICATIONS

Telescopic Shelves
The beech and stainless steel fronted telescopic wire shelves are gentle on the bottles, reducing any accidental scratches on the label and allowing you to easily view your collection.
Perfect for Burgundy, Bordeaux and Champagne bottles.

Air Purifying Technology
Charcoal filters eliminate odours and impurities in the air, preventing them from penetrating the cork, to ensure your collection is at its best when it comes to serving.

Premium Funcionality
Four light settings and four functions means you can find the right storage environment to suit your wine.

PRODUCTS FOR CARE AND CLEANING

We have an amazing range of sinks and taps and always recommend that they are cleaned and cared for to keep their charm and beauty the same as the day they were installed.

CARE OF SINKS

GRANITE

Clearwater
Granite Care Set
Ref. CLEG100 £44

Comprising of -
- Granite Balm 250ml
- Granite Descaler 250ml
- Granite Cleaner 250ml
- Cloth
- Magic Sponge Eraser x 2

CERAMIC & CAST IRON

Clearwater
Cast Iron and
Ceramic Cleaner
Ref. CLEC200 £16

Removes stubborn metal marks and stains with little effort

STAINLESS

HG - Stainless Polish
Ref. 168030106 £9

Designed for maintenance of Stainless Steel, leaving a great shine and streak free, great for combating really tough blemishes.

250ml

CERAMIC & STAINLESS

Cramer - Email Star
Ref. 30100 £16

Sensitive, acid free cleaning and care of Ceramic, Enamel and Stainless surfaces.

100ml

CARE OF TAPS

POLISHING

Cramer - Chrom Star
Ref. 30150 £16

Gentle cleaning and polishing compound for all chrome surfaces.

100ml

FOR DAMAGES TO ENAMEL & CERAMIC

Cramer - Bath & Kitchen Rubber
Ref. 30303 £19

Removes scuff marks, rust and heavy soiling on Enamel and Ceramic without scratching.

Cramer - Repair Kit
Ref. 16XXX £52

For minor damage and chips to Ceramic, Enamel & Acrylic.

For an easy and durable repair.

● Postage and packaging charges may be incurred. ● Cleaning products can either be ordered from the retailer or direct from us.
